Background Soil Concentrations.pdf

Dan & Deb – I spoke to David Ostrander following our call today, and he will be the point of contact with the county when we have our messaging ready regarding the sample results for the additional analytes in the adit discharge. I'm focusing on the cooperative agreements and getting the work plans resolved with Laplata County and others.

David also will determine the level of vetting the messaging goes through and will manage that process.

Please coordinate your messaging with David.

Regarding the dioxin results, I've attached an article from 2013 that may be of some help with respect to characterizing the low-level detections we found.

Let me know if you have any questions.

Thanks,  
Steve

Hi Dan,

I've attached the .zip files in .xlsx. I hope this works, but if not, please let me know and I will make these .piz files.

Thanks,

Moira Pryhoda

I didn't realize there were \*.zip files attached. Can you rename the \*.zip files to \*.piz so our fire will accept them?

Hi Dan,

Yes, all data should be validated with the exception of the rad data. I've attached all validation reports here. Please let me know if you need anything else.

Thanks,

Moira Pryhoda

Hi Moira

I am having trouble deciphering which data are validated and which aren't for the adit samples. Can you send me all of the validated data and validation reports for both the water and sediment sample?

It is my understanding that everything should be available except some of the rads. Correct?

Thanks
